

Alchemex™ is the leading developer, enabler and support provider of affordable Excel-based Business Intelligence (BI) software for small to medium enterprises.

For over 10 000 users worldwide, Alchemex's reporting software gives businesses the edge.

"We use Alchemex™ products extensively in our business. I believe that being able to obtain a 'snapshot view' of your business is critical in today's business environment when there is so often just too much information floating about. Managers need to dedicate their skills to managing – not sifting through endless reports trying to make sense of heaps of information. Alchemex™ does this neatly and efficiently – with no fuss at all and delivers this information "on demand" and through Excel. What more could you ask for?"

Steven Cohen, Managing Director,  
Pastel Software.

Software • Training • Support

# Double click. Single vision.

*True business alchemy is turning vast amounts of raw data into easily accessible, customised displays for dynamic decision-making.*

**This is the power of Alchemex™.**

ALCHEMEX™ reporting software draws data directly from a company's existing accounting or payroll application and in return provides access to innovative, intelligent business reporting through pre-formatted, automated Microsoft Excel report templates. We like to call it Smart Reporting.

# Software

Alchemex™ software eliminates manual report preparation and repetitive data extracts and provides you with up-to-date, accurate and well-presented reports for informed decision-making in your business.

Alchemex™ provides a low-cost integration into existing IT infrastructure while extending and strengthening its functionality. The familiar Excel interface ensures that BI is now highly accessible, allowing insight into your company's business to gain and maintain a competitive advantage.

## ALCHEMEX™ MANAGEMENT PACKS

*Experience enhanced productivity, performance and presentation*

- ▶ Automate monthly management packs and other financial, payroll, sales, inventory and production reports
- ▶ Get pre-formatted Excel templates upon request, leaving little or no work to do to get the results
